
MILAD JAVADI

Dallas-Fort Worth, TX | +1 (309) 242-0312 | milad.javadii@gmail.com | scholar.google.com/citations?user=g9427EQAAAAJ

EDUCATION

M.S., Economics | The University of Texas at Dallas

GPA:3.6

M.S., Finance and Financial Management | Shahed University Of Tehran, Iran

GPA:3.8

B.S., Industrial Engineering | Iran University of Science and Technology

GPA:3.5

Graduate Record Examination: Quantitative 166/170; Verbal 161/170; Analytical Writing 4.0.

RESEARCH INTERESTS AND METHODS

Research interests: Retail and regional food supply chains; demand, inventory, and replenishment modeling; pricing and promotion analytics; supply-chain resilience; food-distribution logistics; inventory waste and product availability; empirical and simulation-based decision analytics.

Current research methods: Applied econometrics; high-dimensional fixed-effects panel estimation; causal machine learning (causal forests, double/debiased ML); event-study and difference-in-differences design; demand and price-elasticity estimation; time-series and deep-learning forecasting; simulation modeling of supply-chain disruption.

Methods for doctoral development: Agent-based modeling; discrete-event and hybrid simulation; stochastic and integer optimization; simulation optimization; design and analysis of computer experiments; supply-chain network modeling.

PROPOSED RESEARCH

Causal Demand Shocks and Resilience in Regional Food Supply Networks. Combines causal demand estimation from retail scanner data with network simulation to evaluate how promotion-driven demand shocks propagate through suppliers, food hubs, distribution centers, and retailers, and which coordination and inventory policies reduce the resulting system cost. Full research statement provided separately.

SELECTED PUBLICATIONS AND SCHOLARLY WORK

Diminishing Returns to Promotion Depth in Grocery: Evidence from Dominick's Cereal (1989 to 1997). *Working paper, 2026. Sole-authored.*

Uses U.S. grocery scanner data to estimate promotional lift, stockpiling, and post-promotion demand effects.

Innovative Simulation Model for Analyzing the Effects of Supplier Disruptions on Supply Chain Distributors. *Journal of Mechanical, Civil and Industrial Engineering, 2025.*

Simulation study of supplier disruption effects across downstream distributors.

Identifying and Prioritizing Sustainable Supply Chain Indicators in the Petrochemical Industry. *Journal of Economics, Finance and Accounting Studies, 2025.*

Supply-chain performance and prioritization framework with sustainability emphasis.

The Impact of Blockchain Technology on Supply Chain Production Strategies. *Journal of Business and Management Studies, 2025.*

Production and supply-chain strategy implications of blockchain adoption.

Citation record: 122 citations; h-index 8; i10-index 7. Full publication list available at scholar.google.com/citations?user=g9427EQAAAAJ.

PROFESSIONAL EXPERIENCE

Director of Procurement and Category Management | Ofogh Koorosh Chain Stores, Tehran | Mar 2013 to Sep 2017

Directed \$500M+ annual procurement across 180+ suppliers for a 900-store grocery network. Designed min/max replenishment policies and distribution-center throughput monitoring, reducing procurement cost 8% year over year and inventory waste 15%.

Chief Executive Officer | Hayat Market, Tehran | Mar 2020 to Mar 2022

Launched and scaled a hard-discount grocery chain from zero to 300 stores in 24 months on \$10.2M first-year revenue. Built twin fresh and ambient distribution centers and established replenishment cadence, inventory controls, and KPI governance across 2,500+ SKUs and 180 suppliers.

General Manager, Operations and Category Pricing | WinMarket, Tehran | Dec 2017 to Jan 2019

Restructured EDLP and Hi-Lo category pricing architecture, increasing same-store sales per square foot by 18%. Led SAP ERP migration across retail, inventory, and distribution processes.

Retail Pricing and Supply-Chain Research Consultant (Independent) | Dallas-Fort Worth, TX | Apr 2022 to Present

Empirical research on U.S. retail scanner data quantifying promotional elasticity, consumer stockpiling, and post-promotion demand; advisory work on pricing, sourcing, and operating-model design.

Earlier roles: Director, FMCG Import and Trading Operations, Farasoo Paydar Trading Co. (2019 to 2020); Director, Commercial Strategy and Commodity Sourcing, Golrang Industrial Group (2011 to 2013); Commercial and Sales Director, Mohsen Group (2008 to 2011).

SELECTED COURSEWORK

Graduate coursework: Econometrics; Advanced Microeconomic Theory; Advanced Macroeconomic Theory; Game Theory; Advanced Mathematical Methods; Advanced Management Information Systems; Management Accounting; Operations Research; Investment Management; Financial Markets.

Undergraduate Industrial Engineering coursework: Operations Research I and II; Engineering Statistics; Probability Theory and Its Applications; Decision-Making Analysis; Production Planning; Production and Inventory Control I and II; Engineering Economics; Statistical Quality Control; Project Control; Work and Time Evaluation; Human Factors Engineering; Numerical Calculations; Computer Applications in Industrial Engineering; General Mathematics I and II; Differential Equations.

TECHNICAL PREPARATION

Demonstrated quantitative methods: Applied econometrics; fixed-effects panel-data estimation; event-study and difference-in-differences designs; causal machine learning; price-elasticity estimation; time-series analysis; statistical modeling; forecasting.

Applied supply-chain preparation: Inventory and replenishment policy; supplier-performance measurement; distribution-center KPI design; production and inventory control; process analysis; scenario analysis; quality management.

Software and systems: Python; R; Stata; SQL; SPSS; Excel; Power BI; Tableau; SAP Retail; MS Project.

CERTIFICATIONS AND INNOVATION

- Project Management Professional (PMP), Project Management Institute, 2025.
- ISO 9001:2000 Quality Management Systems certification.
- Co-inventor, AI-powered smart wearable, PCT/IB2025/054033; Gold Medal recognition at SVIIF (Santa Clara) and IFIA (Geneva).
